The first step to implementing change is communicating the desired change. The same is true when changing governance practices. The template below serves as a starting point for documenting and communicating policy statements that govern IT operations and management in the cloud.

As your discussions progress, use this template's structure as a model for capturing the business risks, risk tolerances, compliance processes, and tooling needed to define your organization's Resource Consistency policy statements.

Important

This template is a limited sample. Before updating this template to reflect your requirements, you should review the subsequent steps for defining an effective Resource Consistency discipline within your cloud governance strategy.
