The first step to implementing change is communicating the desired change. The same is true when changing governance practices. The generic template below provides a starting point for documenting and communicating policy statements that govern security related issues in the cloud.

As your discussions progress, use this template's structure as a model for capturing the business risks, risk tolerances, compliance processes, and tooling needed to define your organization's Security Baseline policy statements.

Important

This template is a limited sample. Before updating this template to reflect your requirements, you should review the subsequent steps for defining an effective Security Baseline discipline within your cloud governance strategy.
